Pandora 2

Pandora has been updated to Pandora 2!

Pandora 2 is formulated to resist flame striking, giving you more time in the flame without altering the kiln strike.

Back orders of Pandora are now being filled with Pandora 2. New Pandora 2 guides are being printed, let us know if you'd like some in your next order.

The Gathering

We hope to see many of you at the International Society of Glass Beadmakers Gathering in Rochester, New York! It's a great time to ask us questions, see finished samples of our colors and check out what might be coming next! We will be "pre-releasing" our next new color, Kalypso, at our booth. We hope to generate lots of excitement about this new color before we release it in August. We'll update you with the release date, description and pictures as we get closer to finishing the production run.

Thanks!
Jed and Julie
