## Zephyr

Friday, October 14th 2011 at  
12 am Pacific Time.  
\$40/lb

Zephyr is our clear glass that has been formulated to melt smoothly and easily in the torch; resist boiling and scumming; have a low reactivity with silver glasses; exhibit a low seed count and be fingerprint and dust free. Every pot of Zephyr is tested compatible with Effetre clear.

It is sold in paper wrapped, one pound bundles to keep it dust and fingerprint free.

We released a prototype version earlier this year and took your feedback to make small adjustments. We took that adjusted version and sold it at the ISGB Gathering in Louisville. It was well received and we have been making that same version since we came home so that we would

have plenty on hand.

Thank you,  
Jed and Julie Hannay
