

Sept. 2009

### Test Batches

We are listing several test batches on our site today. Some of them have very small quantities.

### Shards

Several of our colors are now available in shards and we will continue to make more of them as colors go back into production. We just made our first Elektra2.1 shards and we even have a test batch in shards.

### Aether

She is not ready yet. We appreciate your enthusiasm. We will keep you posted on our progress.

### Other News

We hope you had a great summer! We enjoyed making new friends and new memories with so many of you at The Gathering and The Bash!

Thank you!
